Testing for all common (& not-so-common) infections... Measles t⬤⬤

Your provider partners with HealthTrackRx to offer the next-morning results.

## What You Need to Know About Measles

How Measles Spreads

According to the CDC, while just a small population is affected, measles is extremely contagious and can infect up to 90% of nearby unvaccinated people. It spreads through airborne droplets and contaminated surfaces.

At-Risk Populations

- Anyone unvaccinated
- Children under 5
- Adults over 20
- Pregnant women
- People with weakened immune systems

Exposure Timeline

Days 1 - 14

Day 1
Exposure/Infected

~Day 7-14
First Symptoms Show:
- Fever
- Cough
- Runny Nose
- Red, Watery Eyes

~Day 11
(about 2-3 days after first symptoms)
Tiny white spots (Koplik spots) may appear inside the mouth

~Day 14
(about 3-5 days after first symptoms)
Measles Rash Begins: Flat red spots will manifest on the face & hairline, spreading downward from there.

Signs & Symptoms

At first, measles can present like other viruses.

Symptoms	Body Aches	Cough	Diarrhea	Ear Infection	Fatigue	Fever/Chills	Headaches	Rash or Raised Bumps	Red, Watery Eyes	Runny Nose/Congestion	Shortness of Breath	Sore Throat	White Spots in Mouth

Test Today, Results Tomorrow

When your provider uses HealthTrackRx, you'll get next-morning test results.

Head-to-Toe Molecular Testing

HealthTrackRx's PCR testing technology gives providers the ability to test for infections with greater accuracy. We even make sample collection easy and deliver reporting with antibiotic-resistance gene data, ensuring you receive the right treatment the first time.

We've Got You Covered: Payment & Insurance

HealthTrackRx is covered by most insurance companies, including Medicare and Medicaid. And, if you do not have insurance, we offer various affordable payment options—including a tiered financial assistance program.
