

This Affects Everyone

Antibiotic resistance isn't an individual issue—it's a global health threat that impacts us all.

See how we are fighting back.

Every Test Fights Resistance

Taking unnecessary antibiotics contributes to the creation of superbugs that are resistant to treatment. Fast, accurate HealthTrack PCR testing identifies the exact cause of your infection, so your provider knows when antibiotics are the right answer.

Ask for
HealthTrack
testing.

HEALTH  TRACK

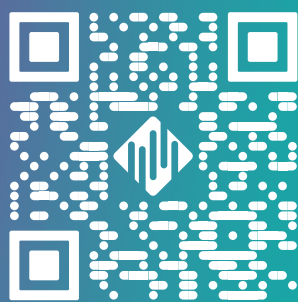

Not Every Bug

Needs A Drug

Antibiotics only work on bacterial infections—not viruses like colds, flu, or COVID-19.

Fast HealthTrack PCR testing helps your provider know exactly what's causing your symptoms, so you get the right care the first time. Ask your provider about HealthTrack testing today.
